CORPORATE CAPABILITIES

Corporate Description

Since its inception in 1954, the Elizabeth Companies has grown to become one of the world's leading manufacturers of rotary and single-station press tooling, tableting presses, control systems, and auxiliary equipment for clients in the pharmaceutical industry. To increase capacity and to better service the European community, EPMO of Blois, France, was purchased. EPMO is a proven leader in tablet compression and blister-packaging tooling. In addition, Scheu & Kniss of Louisville, Kentucky, a US leader in the manufacture of tablet press replacement parts and rebuild services, was acquired. These acquisitions enhance the mission of advancing worldwide tableting technology by identifying customer needs and creating products and services to meet them.
