Baxter

BioPharma Solutions

MARKETS SERVED

Baxter has more than 80 years of parenteral contract manufacturing experience with over 50 manufacturing facilities across six continents. Baxter's global presence provides opportunities for unique manufacturing collaborations to provide the most value for our partners. The power of an extensive global network lies in the coordination of, and efficiencies resulting from, a systemic approach to cGMP manufacturing.

COMPANY DESCRIPTION

BioPharma Solutions, a business unit of Baxter, works with pharmaceutical companies to support their commercialization objectives by providing sterile manufacturing solutions, parenteral delivery systems, and customized support services needed to meet the unique challenges that parenteral products face. BioPharma Solutions has over 25 years of successful collaborations working with over 60 pharmaceutical clients in developing and launching their product and has been honored with various global distinctions by the industry.

MAJOR PRODUCTS AND SERVICES

Parenteral manufacturing can be a complex process. As a parenterals specialist, BioPharma Solutions offers unique delivery systems and a wide variety of manufacturing solutions to meet complex and traditional sterile manufacturing challenges. Cytotoxics, antibody-drug conjugates (ADCs), highly potent compounds, biologics, and lyophilized products require specialized understanding; and BioPharma Solutions offers dedicated facilities that utilize experienced operators, sophisticated equipment/systems, robust standard operating procedures, and training/risk assessments to handle these drug categories. Our contract manufacturing services provide customers access to world-class scientific expertise, state-of-the-art facilities, and processes designed to help ensure a reliable supply of quality product to the market.

Areas of Expertise include:

- Sterile Manufacturing Solutions
  - o Prefilled Syringes
  - o Lyophilized Vials
  - o Diluents for Reconstitution
  - o Sterile Crystallization
  - o Liquid Vials
