Pharma Tech Industries

Company Description
The largest contract manufacturer and packager of powder products in the world, Pharma Tech Industries (PTI) has been serving the needs of leading global pharmaceutical and personal-care companies with product development, manufacturing and packaging services for more than 40 years. With annual revenues over US $80 million, PTI is a private, family-owned business that prides itself on exceeding quality and customer service levels for its clients. PTI currently serves more than a dozen global pharmaceutical clients in two cGMP facilities and produces more than 300 SKUs of powders, effervescent and solid-dose products, and capsules, as well as cotton swabs and injection-molded components.

Facilities
With strategically located, fully-integrated facilities in Royston, GA, and Union, MO, PTI has more than 400,000 sq. ft. of combined cGMP development, manufacturing, and packaging space. This includes nine ISA Design Clean Rooms for manufacturing and packaging of Rx and NDA products, full analytical and microbial laboratories for on-site testing and a dedicated machine shop for custom component design and refurbishment.

Services
Pharma Tech Industries controls the supply chain process of pharmaceutical products through turnkey services such as:

- Contract manufacturing including powder blending, solid dose compression, effervescent products, and cotton swab manufacturing.
- Contract packaging including bottle filling, stick packs, pouch (unit dose) filling, cartoning, labeling, and custom packaging.
- Contract molding of caps, bottles, components and medical devices through injection molding, single and bi-component injection molding, compression molding, and profile extrusion.
- Technology transfer including transfer of late-stage R & D, transfer of dedicated large and small-scale operations, transfer of niche processes, and vertical integration.
- On-site, full-scale testing with both microbial and analytical capabilities.

Recent Developments
- PTI has completed a state-of-the-art analytical laboratory in its Royston, GA headquarters to broaden the company's on-site testing capabilities. Both prescription and over-the-counter drugs will be tested in the new facility.
- PTI stood out among 67 CMOs to be named Best Overall Supplier by one of the world's five largest pharmaceutical companies. Criteria included quality, customer service, supplier collaboration, responsiveness to client needs, inventory management, and financial collaboration.
