UPM Pharmaceuticals®, Inc.

Corporate Description

UPM Pharmaceuticals®, Inc. is a Baltimore-based drug development and contract manufacturing company providing customized formulation development, manufacturing, and analytical services to pharmaceutical, biotechnology, and university clients. Fully appreciating that flexibility and time-to-market are critical; UPM is highly responsive to clients' program changes and specializes in developing creative solutions to unique challenges. UPM is characterized by the timeliness and thoroughness with which all projects are managed. Every step of the way, UPM Pharmaceuticals works to advance and optimize products through up-to-date resourceful approaches, while adhering to the highest quality standards. Through the years, our staff and systems have been consistently challenged by FDA, DEA, QP, and client audits and we have passed these rigorous inspections repeatedly.

Technical Services

UPM's scientific team includes some of the industry's best analytical chemists, formulators, and manufacturing specialists. The company's experienced scientists provide innovative ideas and guidance to address clients' unique product development challenges such as low-dose content uniformity, high-dose compressibility, controlled drug release rates, and experimental designs for limited API availability. The UPM staff utilizes daily planning meetings and a master scheduling process to ensure that every project will be completed efficiently and on time. Their highly experienced quality assurance personnel implement complete cGMP quality systems that support formulation development, clinical batch manufacturing, and analytical testing.

Formulation Development

- BREVI-BATCH™ mini-batch proof-of-concept studies
- Low Solubility Solutions
- Solid Oral Dosage Forms
- Liquids & Gels
- Coating
- CII-CIV Controlled-Drug Substances

cGMP Manufacturing

- Feasibility to small scale commercial
- Wet Granulation/Dry Granulation
- Roller compaction
- Immediate and Controlled-Release Tableting
- Bi-Layer Tableting
- Tablet and Particle Coating
- Direct API Fill into Capsules for Proof-of-Concept Studies
- Encapsulation (Powders, Granules, Tablets, and Combos)
- Over-Encapsulation
- Solid-dose and Liquid Packaging
- Blinding of Clinical Supplies
- Low % Relative Humidity
- Hi-Potency/Toxicity Products

Analytical Services

- HPLC Based
- uHPLC Processing
- Full ICH Stability Testing
- Dissolution Testing
- Particle Size Analysis

Facilities

The Baltimore, MD facility is DEA licensed and FDA inspected. It features cGMP pharmaceutical manufacturing and packaging suites, including Xcelodose® processing suites and a low % humidity/high toxicity suite. The facility also includes analytical and R&D laboratories staffed by industry veterans.

Markets Served

UPM is a provider of high quality services to the pharmaceutical, biotechnology, government, and university markets world-wide. The company's history includes successful collaborative interactions with virtual to multimillion dollar clients.
