Facilities

Being comprised of multiple cGMP manufacturing facilities across Europe and the US, CordenPharma is linking together a legacy of expertise formed from each facility's respective areas of scientific, operational, and R&D experience. Our plants are audited by all relevant approval authorities.

Major Products / Services

CordenPharma provides expert **API Development and Manufacturing** via the full spectrum of cGMP synthesis and chemical manufacturing services from early stage to product launch, including highly potent, sterile, and generic APIs. CordenPharma also draws upon a wide range of production capacity for the synthesis and purification of peptides.

CordenPharma's **Drug Product Development and Manufacturing** facilities are designed to manufacture solid dose and parenteral formulations of oncologicals, cephalosporins, penicillins, and hormones. Expertise in handling sterile powders and injectable liquids is available, as well as highly potent drug products. CordenPharma also provides a wide range of specialized packaging technologies.

Markets Served

CordenPharma is full-service CMO for a global market, providing Contract Development and Manufacturing of APIs and Drug Products for both nationally and internationally-oriented pharmaceutical customers worldwide.
