CHEMICAL MFG CORP

Corporate Description

Founded in 1971, Spectrum Chemical Mfg. Corp. offers the largest selection of monograph chemicals for drug and food manufacturing available from a single source. Spectrum has in place the documentation, validation, and qualification systems expected by pharmaceutical manufacturers in today's enhanced regulatory climate. Spectrum actively supports Rx-360, an international pharmaceutical supply chain consortium, and supports transparency in the supply chain.

Facilities

Spectrum has production, quality control laboratories, warehousing, and distribution facilities in New Brunswick, NJ and Gardena, CA. All US production facilities are ISO 9001:2008 certified, FDA registered, and operate under current Good Manufacturing Practices (cGMP).

Major Products/Services

Spectrum manufactures and distributes fine chemicals and laboratory products with quality and delivery you can count on every time. The Company's major emphasis is on **USP, NF, FCC, BP, EP, JP** and **ACS** grade products, active pharmaceutical ingredients and controlled substances, excipients, dietary supplements, cosmetic ingredients, biochemicals, pre-made solutions, and a complete line of high purity solvents for critical analytical applications. These products are available in laboratory research, scale-up, and production quantities.

If you use research organic chemicals you now have a choice. Now available from Spectrum are over 22,000 TCI organic chemicals. TCI is an internationally recognized leader providing specialty chemicals for research and science including organic synthetic reagents and intermediates, inorganic and organometallic reagents, life science and glycochemicals (custom and from-stock oligosaccharides), material science building blocks plus chromatography reagents and columns.

Spectrum also provides US-based custom synthesis and contract manufacturing capabilities, including the custom synthesis of new chemical entities (NCE's) and commercial cGMP manufacture of active pharmaceutical ingredients, DEA Controlled Substances (Schedules II-V) and their chemical intermediates.

Spectrum is a full-line distributor of laboratory supplies and equipment items featuring PerkinElmer's complete line of consumables for GC, HPLC, IR, UV/VIS, AA, ICP, mass spectrometry and thermal analysis instrumentation. Combined with additional labware, consumables, lab equipment and appliances products from over 250 manufacturers, including Mettler-Toledo, Ohaus, Corning, Microflex, Thermo Scientific, Wheaton, Kimble Chase and GE Whatman, Spectrum is truly a one-stop shopping destination with over 150,000 chemicals and consumable items available.

Markets Served

Spectrum's target markets for cGMP monograph chemicals include manufacturers of pharmaceuticals, dietary supplements, functional foods, and personal care products. Spectrum also serves the analytical laboratory and synthetic organic chemistry research marketplace with a complete line of organic building blocks, analytical reagents, solvents, consumables, and equipment suitable for all laboratory applications.
