MANUFACTURING Equipment and Supplies

Natoli Engineering Company, Inc.

Corporate Description

A global leader for more than 35 years, Natoli Engineering Company, Inc. is the worldwide source for superior tableting equipment and support services. Founded on the simple philosophy of providing quality tablet compression tooling at a fair price with exceptional customer service, Natoli is committed to developing innovative solutions that exceed the highest industry standards and specifications.

Facilities

Located in one of the Midwest's finest progressive industrial parks, the Missouri Research Park of St. Charles, Natoli's 120,000-square-foot campus includes administrative, manufacturing, refurbishing, training, laboratory, and teleconferencing facilities. Natoli also has two additional manufacturing and shipping facilities just east of their main campus.

Major Products/Services

Tablet Compression Tooling—Featuring a complete selection of premium tooling, with more than 20 steel types and 10 specialty coatings to choose from.

Tablet Presses—Offering a full range of cost-effective options, from heavy-duty rotary presses to single station laboratory models ideal for research and development.

Tablet Press Replacement Parts—Maintaining an inventory of over 300,000 parts and turrets for nearly every press type and model allows same-day shipping for most items.

Tablet Compression Accessories Catalog—With over 200 innovative products available for worldwide shipment, the all-new accessories catalog is the most comprehensive collection in the industry.

Tool Inspection and Database System—The LVS laser inspection device and TM-II database software interface seamlessly to provide the most powerful tool inspection and control system available.

Laboratory Services—Natoli Scientific utilizes a network of university, consultant and resident resources to investigate problems and offer customers unique solutions to their formulation and tooling requirements.

Technical Training—Learn the latest tablet technologies and improve your processes through hands-on training and lectures from world-renowned academic and industry experts.

Tablet and Tooling Design—Natoli engineers provide expert tablet and tool design services to ensure tablet quality, maximize production, and enhance product lifecycle.

Tablet Press Refurbishing and Repair—Available for most makes and models, Natoli's expert engineers customize each request and strategically rebuild each press to exceed original quality, safety, and functionality.

Markets Served

With distributors in more than 70 countries, Natoli serves the pharmaceutical, nutraceutical, industrial, confectionary, veterinary, and chemical industries worldwide.
