OUTSOURCING and Consulting Services

AMRI

(Albany Molecular Research, Inc.)

Corporate Description

Albany Molecular Research, Inc. (AMRI) is a global contract research and manufacturing organization offering customers fully integrated drug discovery, development, and manufacturing services. For over 21 years AMRI has demonstrated its adaptability as the pharmaceutical and biotechnology industries have undergone tremendous change in response to multiple challenges. SMARTSOURCING™, a full range of value-added opportunities provides customers with informed decision-making, enhanced efficiency, and more successful outcomes at all stages of the pipeline.

Major Products/Services

Contract Research/Discovery

AMRI's integrated approach to drug discovery and development, includes capabilities in the areas of *in vitro* biology, *in vitro* pharmacology, DMPK, medicinal chemistry, computer-aided drug discovery (CADD), and structural biology and screening. The company applies medicinal chemistry to modify the structure of a hit compound, or series of hit compounds, to synthesize new molecules with the end goal of discovering compounds that are suitable for progressing into the human clinical trials phase. AMRI's biology capabilities, which easily integrate with its chemistry services, include target and biomarker validation; assay development and design; *in vitro* pharmacology, such as potency, selectivity and mechanism-of-action studies; high-throughput screening (HTS); chemical genomics; *in vitro* DMPK; *in vivo* DMPK and *in vivo* pharmacology.

Development

AMRI SMARTSOURCING™ provides state-of-the-art facilities and capabilities to deliver integrated pharmaceutical drug development programs through the clinic to commercial. AMRI's Pre-Formulation Development, Formulation Services & CTM, Process Development, and Analytical Services are available for a variety of dosage forms, from Powder-in-a-Bottle (PIB) and capsules to advanced oral,

topical, and sterile formulations. The company also has the capabilities required to provide a reliable and cost-effective supply of drug product through commercial production, as well as API from pre-clinical to post-NDA commercial production.

Contract Manufacturing

AMRI's worldwide manufacturing facilities are equipped for Phase I through commercial API manufacturing and AMRI SMARTSOURCING™ provides an added advantage as customers move their compound from discovery to high potency manufacturing. AMRI's global sites are positioned to provide tailored solutions and to enable the efficient, cost-effective transfer of pre-clinical and commercial drug products—from small-scale to large-scale production. AMRI can provide raw materials, starting materials and cGMP manufacturing of API.

Aseptic Fill and Finish

In the company's state-of-the-art cGMP manufacturing facility, in Burlington, Mass., AMRI offers customers aseptic processing services, including aseptic filling of syringes, vials, and other custom containers; lyophilization; and the very latest in Stability Optimization Services (SOS). AMRI supports clients from pre-clinical stages of development through cGMP clinical and commercial scale production of liquid-filled parenterals.

Major Markets

AMRI works with large global and small-to-medium-size biotech/specialty pharmaceutical companies, and government and nonprofit organizations.
